Subject: RE: 4 yearly review of modern awards – Pharmacy Industry Award – AM2014/209 and AM2016/15

Good Afternoon Ms Dunn

As requested, PGA as discussed with the other interested parties on the agreed wording to describe a Dispensary Assistant that could be used being:

A Dispensary Assistant is a suitably qualified non-pharmacist, who performs appropriately supervised dispensary tasks according to state/territory legislation and professional guidelines to assist a pharmacist in ordering and unpacking of stock; repackaging stock; preparing dispensing labels; attaching dispensing and cautionary and advisory labels; gathering non-clinical information and collating prescriptions.

A dispensary assistant may also assist a pharmacist in the delivery of professional services such as the preparation of dose administration aids, collating staged supply medicines and administrative tasks for other services.
